

Nunavut Housing Needs Survey Fact Sheet – Kimmirut

Background:

The Nunavut Housing Needs Survey (NHNS) is a survey of households in 25 communities in Nunavut, conducted from November 2009 to June 2010. The primary objective of the survey was to collect data on the housing needs of Nunavummiut so as to assist the Government of Nunavut in planning and providing housing. The overall response rate was 87% for Kimmirut.

This fact sheet presents some of the survey results for Kimmirut. Similar fact sheets are available for the territory as a whole and for each region and each community. All numbers in this fact sheet have been rounded. Percentages were calculated from unrounded numbers and the denominator excludes the non-response categories "refusal", "don't know", and "not stated".

More survey information and results are available on the Nunavut Bureau of Statistics' website which may be accessed at <http://www.eia.gov.nu.ca/stats/housing.html> or you may wish to contact one of our Information Officers at 867-473-2656 or 867-473-2660. Collect calls are accepted.

Survey highlights for Kimmirut:

Housing stock and housing tenure in Kimmirut:

- A) Kimmirut had a total of 130 dwellings, of which 120 were occupied by their usual residents. The remaining 10 dwellings were unoccupied or occupied temporarily by persons who considered their usual home elsewhere.
- B) The most common type of dwelling was single detached houses (58%).
- C) Of the 120 dwellings occupied by usual residents, about 8 dwellings out of 10 were rented while 2 out of 10 were owned.
- D) Most of the housing occupied by residents of Kimmirut was classified as public housing, which made up slightly less than three-quarters of all occupied dwellings. The second most common type of housing was owner-occupied dwellings, representing about 2 dwellings out of 10. The remaining occupied dwellings were staff housing and other types of rented housing.

Nunavut Housing Needs Survey

Fact Sheet – Kimmirut

State of housing for dwellings occupied by usual residents in Kimmirut:

- E) Of the 120 households, which is the equivalent of all dwellings occupied by usual residents, about 6 out of 10 were satisfied with the condition of their dwelling.
- F) About 16% of occupied dwellings (20) required major repairs for items such as defective plumbing or defective electrical wiring, a leaking oil or sewage tank, or a broken hot water boiler. The need for major repairs is based solely on the opinion of the respondent.
- G) Approximately 24% of occupied dwellings (30) were classified as crowded, based on the lack of enough bedrooms. The majority of those dwellings (20 out of 30) were classified as crowded because they required one additional bedroom. The other crowded dwellings required two or more additional bedrooms.
- H) In more than half of the crowded dwellings, respondents indicated that they regularly used the living room for sleeping because there was no other place to sleep.
- I) In Kimmirut, 36% of the occupied dwellings (40) were below housing standards, meaning they were either crowded or in need of major repairs or a combination of both. Housing affordability was not measured in the survey.
- J) Owner-occupied dwellings had the highest proportion of dwellings below housing standards (44%) compared with other types of housing such as public housing, staff housing or other rental housing.

Chart 1. Summary of the state of housing for dwellings occupied by usual residents, Kimmirut, Baffin region and Nunavut, 2009-2010

Note: The need for major repairs is based on the opinion of the respondent. A dwelling is classified as crowded if there is a lack of a sufficient number of bedrooms.

Nunavut Housing Needs Survey

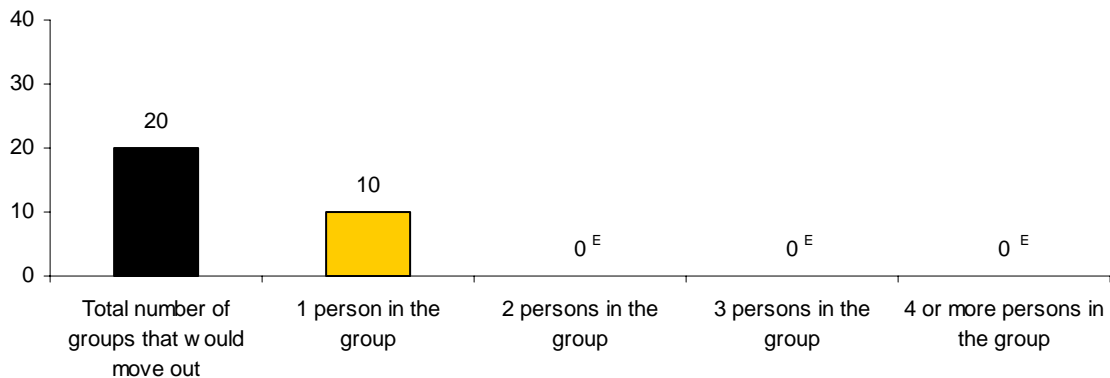

Fact Sheet – Kimmirut

Kimmirut housing needs for dwellings below housing standards:

- K) For each person in a household, the survey asked if they would move out if additional housing were available in their community.
- L) In slightly less than half of the occupied dwellings below housing standards in Kimmirut, about 20 out of 40, at least one person or a group of household members would move out if more housing were available.
- M) Out of the 190 persons living in a dwelling below housing standards, 40 of them or 1 out of 5 responded that they would move out if more housing units were available in their community.
- N) Of the 40 people who would move out, some of them would move out on their own and others would move out with people living in the same dwelling or elsewhere. This represents a total of 20 groups of people that would move out of their current housing if additional housing were available.
- O) This number of groups (20) represents the number of dwellings that would be required to house the groups moving out of dwellings below housing standards. About 65% of these groups wishing to move would be people moving out alone while approximately 35% would be a group of two or more persons moving out together.

Chart 2. Number of dwellings required to house groups moving from dwellings that are below housing standards by group size, Kimmirut, 2009-2010

Number of groups of people who would move out of their dwelling that is below housing standards

^E Use with caution as the estimate has a high variability.

Nunavut Housing Needs Survey

Fact Sheet – Kimmirut

People in immediate need of housing in Kimmirut:

- P) A very small number of people in Kimmirut did not have a usual home at the time of the survey and were living temporarily in another person's dwelling.
- Q) Slightly less than 2 occupied dwellings out of 10 housed temporary residents without a usual home elsewhere in the 12 months prior to the time of the survey.

People on the waiting list for public housing in Kimmirut:

- R) About 10 people of Kimmirut aged 15 years and over reported that they were on the waiting list for public housing. This represents less than 1 person out of 10 for those aged 15 and over.
- S) The number of people aged 15 years and over in Kimmirut by the length of time on the public housing waiting list is too unreliable to be published.

Please note that the data for Chart 3 is too unreliable to be published.

Telephone and Internet access in Kimmirut:

- T) About 50 households or 4 out of 10 in Kimmirut had access to the Internet from within their dwelling.
- U) The majority of households, or 77%, had a telephone. Most of these households had a regular land line telephone.
