

Public Health Advisory

Reminder: Boil Water Advisory for Clyde River

November 29, 2021 Clyde River, Nunavut

The Department of Health reminds that all residents of Clyde River must boil their water before consumption until further notice.

This is a precautionary measure due to a mechanical issue at the water treatment plant.

During a boil water advisory, all water for consumption must be brought to a rolling boil for a **minimum** of one full minute.

It is essential that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.

It is not necessary to boil water used for anything other than the above list.
