

## **Public Service Announcement**

## COVID-19 booster vaccine clinic at the QGH

Start Date: December 16, 2021 End Date: December 18, 2021

Iqaluit, Nunavut 60 sec

Two doses and a booster shot of a Health Canada approved COVID-19 vaccine provide better protection against COVID-19 and new variants, such as Omicron.

On Saturday, December 18, from 10 a.m. to 3 p.m., Iqaluit Health Services will be offering the SPIKEVAX Moderna and Pfizer-BioNTech COMIRNATY COVID-19 booster vaccines at the Qikiqtani General Hospital, on the clinic side. This is a walk-in clinic for all adults who received their second dose at least six months ago (on or before June 19, 2021). Please bring your health care card and Proof of Vaccination Certificate or wallet vaccine card indicating you received your second dose. Taxi vouchers will be available, if required.

Physical distancing, hand hygiene and enhanced cleaning practices will be in place to help keep everyone healthy. Masks are mandatory.

The COVID-19 vaccine is the best protection against this virus, and all Nunavummiut are encouraged to be vaccinated as soon as they are eligible.
