

Public Health Advisory

Possible case of rabies in Kugaaruk

June 1, 2022 Kugaaruk, Nunavut

The Department of Health is advising residents of Kugaaruk that a dog in the community was euthanized after it killed a fox that showed possible signs of rabies.

Due to the danger of rabies, the Department of Health advises all residents to be on the lookout for foxes in the area.

If you have been bitten or scratched by a fox or a dog, go to the local health centre and report the incident **immediately**. Treatment must be started quickly after exposure, as rabies infections are almost always fatal.

Domestic animals that spend time tied up outdoors should be monitored for a change in behaviour and signs of rabies. Signs of rabies include behaving strangely, staggering, frothing at the mouth, choking, or making strange noises. Animals exhibiting these signs should be avoided and reported to the Regional Environmental Health Office or Conservations Officer.

If you see a fox or wolf wandering around the community, contact the Conservation Officer at 867-769-7011. If your dog had contact with a fox or wolf, call the Regional Environmental Health Officer at 867-983-4326.
