Principal Recertification Professional Development Log

Under Sections 3 (5) (b) of the Education Staff Regulations, the NWT Teacher Qualification Service shall establish policies and procedures for the certification and recertification of teacher's holding a 'Certificate of Eligibility as Principal'. The NWTQTS has determined that a 'Certificate of Eligibility as Principal' shall be valid for 5 years and the process for renewal shall be parallel to that of teacher recertification. In addition, NWTQTS has determined that: "During the five year period the Principal Certificate is valid, a holder must participate in a minimum of 40 hours of professional development in the area of educational administration. This professional development will be recorded in a log, verified by the appropriate supervisor, and submitted with the application for recertification." For continuing holders of a principal's certificate, the five year period of validity of the certificate is effective from July 1, 1997. For new holders who have completed the Principal Certification Program after that date, the five year period will begin effective the date that the certificate is issued.
